Yousaf Zeb

Full Stack Software Engineer | React, TypeScript, FastAPI, Flask, SQL, Docker

478-342-1894 | yousafzeb@gmail.com | LinkedIn | GitHub | Portfolio

MBA-qualified Full-Stack Software Engineer with a background in sales operations and inventory management. Builds production-grade applications using React, TypeScript, Flask, FastAPI, and PostgreSQL — with 130+ automated tests, Docker-orchestrated deployments, and CI/CD pipelines across 5+ shipped projects. Integrates OpenAI APIs for AI-powered workflow automation and document analysis, combining business insight with hands-on engineering execution.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Frontend: React, Redux Toolkit, React Query, Tailwind CSS, Vite, Bootstrap
Backend: Flask, FastAPI, REST APIs, WebSocket, Celery, Pydantic, Marshmallow
Auth & Security: JWT, bcrypt, Rate Limiting, CORS, Security Headers
Databases: PostgreSQL, MySQL, SQLAlchemy, Redis, Alembic
DevOps & Testing: Docker, Nginx, GitHub Actions (CI/CD), Git, Pytest, Vitest, React Testing Library, Postman
Integrations: OpenAI API, Firebase
Certification: Coding Temple — Full Stack Software Engineer

Projects

Flow-Pilot — AI Workflow Automation | *React, TypeScript, FastAPI, PostgreSQL, Redis, Celery, Docker, CI/CD*

- Built a drag-and-drop workflow builder with React Flow, OpenAI-powered graph generation, real-time WebSocket monitoring, and an async FastAPI backend with Celery task queue, JWT auth, and 30+ tests across a 5-service Docker Compose stack.

AI Business Operations Assistant | *React, TypeScript, Flask, PostgreSQL, Redis, Docker, Nginx, CI/CD*

- Developed an AI-powered document analysis platform with file upload, expense tracking, and analytics dashboards, secured with JWT refresh token rotation, Redis-backed rate limiting, security headers, and 36 automated tests.

Experience

Software Engineer Apprentice | Coding Temple | Remote
Sep 2025 – Present

- Built and deployed 5+ full-stack applications using React, TypeScript, Flask, FastAPI, PostgreSQL, and Docker, with OpenAI API integrations for AI-powered workflow automation and document analysis.
- Established production-grade engineering practices across projects: 130+ automated tests, JWT authentication, Redis caching, Docker Compose orchestration, and CI/CD pipelines via GitHub Actions.

Independent Contractor, Wholesale Purchasing & Inventory Assistant | Georgia, USA
Aug 2022 – Sep 2025

- Managed inventory logistics and procurement systems for 100+ SKUs across multiple retail locations, applying spreadsheet-based data analysis and forecasting to reduce stock shortages by 20% and improve supply chain efficiency.

Assistant Sales Manager | Master Industries | Pakistan
Jan 2017 – Mar 2022

- Analyzed customer and sales performance data to drive a 10% increase in monthly revenue, translating business metrics into actionable sales strategies and improving repeat business by 15%.

EDUCATION & CERTIFICATION

Coding Temple, *Certificate - Software Engineering*
Capital University of Science and Technology, Islamabad — *MBA, Marketing*
